

DEPARTMENT OF MICROBIOLOGY

WORLD HEPATITIS DAY

[JULY-28-2022]

World Hepatitis Day, 28 July, is an opportunity to step up national and international efforts on hepatitis, encourage actions and engagement by individuals, partners and the public and highlight the need for a greater global response as outlined in the WHO's Global hepatitis report of 2017. The date of 28 July was chosen because it is the birthday of Nobel-prize winning scientist Dr Baruch Blumberg, who discovered hepatitis B virus (HBV) and developed a diagnostic test and vaccine for the virus.

THEME FOR WORLD HEPATITIS DAY 2022

This year's theme, “Bringing hepatitis care closer to you”, aims to raise awareness about the need to simplify and bring hepatitis care to primary health facilities, community-based venues and locations beyond hospital sites, so that care is closer to communities and people wherever they are.

ACTIVE PARTICIPATION OF STUDENTS ON WORLD HEPATITIS DAY

On July 28th 2023, World hepatitis day our students from the department of microbiology has given their ppt presentation to create awareness among the students about hepatitis it's epidemiology, symptoms, transmission and treatment etc.

One of our students P. Akhila from 2nd year explained it clearly about the occurrence, transmission, spread rate and the effect of hepatitis on human lungs.

Another student S. Kusuma from 2nd year explained the symptoms, diagnostic methods and treatment for deadly hepatitis in their ppt presentation
